

Tabella 1

Fabio	META	Ris	Bibtex	citeproc	schemaOrg	resourceTypeGeneral
	doco:abstract: A brief summary of a book, a research article, thesis, review, conference proceeding or any in-depth analysis of a particular subject or discipline, the purpose of which is to help the reader quickly ascertain the publication's purpose.	ABST (abstract reference)				
	deco:Acknowledgements: Usually part of the preface, or a separate section in its own right, often as part of the back matter, it acknowledges those, including funding agencies, who contributed to the undertaking of a research project described in a publication, or to the creation of the work in some way. In scientific articles, the acknowledgements are usually placed as a separated section immediately following the Discussion or Conclusions.					

Fabio	META	Ris	Bibtex	citeproc	schemaOrg	resourceTypeGeneral
Fabio:Retraction	Fabio:Retraction A formal statement retracting a statement or publication. A retraction is a public statement made about an earlier statement that withdraws, cancels, refutes, diametrically reverses the original statement or ceases and desists from publishing the original statement.					
fabio:NewspaperArticle An article written by a journalist and published in a newspaper.	Newspaper Article	NEWS (newspaper)				
fabio:presentation: A set of slides containing text, tables or figures, designed to communicate ideas or research results, for projection and viewing by an audience at a conference, symposium, seminar, lecture, workshop or other gatherings, typically embodied in a particular manifestation format such as a SlideShare or PowerPoint slideshow.	fabio:presentation	SLIDE (slide)				
fabio:Expression. A subclass of FRBR expression, restricted to expressions of fabio:Works. For your latest research paper, the preprint submitted to the publisher, and the final published version to which the publisher assigned a unique digital object identifier, are both expressions of the same work.	Bibliographic resource					

Fabio	META	Ris	Bibtex	citeproc	schemaOrg	resourceTypeGeneral
fabio:ArchivalDocument . An archival document is a realization of the content related to an archival record. It can be exemplified as a book, a document, a letter, a database, etc.	Archival document : An archival document is a realization of the content related to an archival record. It can be exemplified as a book, a document, a letter, a database, etc.					
book : A non-serial document that is complete in one volume or a designated finite number of volumes. A book published by a publisher is usually identified by an International Standard Book Number (ISBN), and may be manifested as a physical printed publication on paper bound in a hard or soft cover, or in electronic format as an 'e-book'.	book : A non-serial document that is complete in one volume or a designated finite number of volumes. A book published by a publisher is usually identified by an International Standard Book Number (ISBN), and may be manifested as a physical printed publication on paper bound in a hard or soft cover, or in electronic format as an 'e-book'.	BOOK √ (whole book reference)	book √ : A book with an explicit publisher. booklet : A work that is printed and bound, but without a named publisher or sponsoring institution.	book √ A book or similar work; Can be an authored book or an edited collection of self-contained chapters; Can be a physical book or an ebook; The format for an ebook may be specified using medium; Can be a single-volume work, a multivolume work, or one volume of a multivolume work; If a container-title is present, the item is interpreted as a book republished in a collection or anthology; Also used for whole conference proceedings volumes or exhibition catalogs by specifying event and related variables	"Book" √(Thing > CreativeWork > Book)	Book : medium for recording information in the form of writing or images, typically composed of many pages bound together and protected by a cover
dataset(or data file) : A collection of related facts, often expressed in numerical form and encoded in a defined structure. fabio:DataFile	dataset(or data file) : A collection of related facts, often expressed in numerical form and encoded in a defined structure.	DATA √ (data file)		Dataset √: A data set or a similar collection of (mostly) raw data	"Dataset" √ (Thing > CreativeWork > Dataset)	Dataset . Data encoded in a defined structure
Thesis : A book authored by a student containing a formal presentations of research outputs submitted for examination in completion of a course of study at an institution of higher education, to fulfil the requirements for an academic degree. Also know as a dissertation. [For the alternative meaning of the word 'thesis', namely the formulation of a concept, hypothesis, idea, point of view or theory presented for review and/or discussion, use fabio:Proposition.]	dissertation : A book authored by a student containing a formal presentations of research outputs submitted for examination in completion of a course of study at an institution of higher education, to fulfil the requirements for an academic degree. Also know as a dissertation. [For the alternative meaning of the word 'thesis', namely the formulation of a concept, hypothesis, idea, point of view or theory presented for review and/or discussion, use fabio:Proposition.] (Crossref : includes single dissertations and theses, but not collections.)	THES √ (thesis/ dissertation)	<u>mastersthesis</u> : A master's thesis. // <u>phdthesis</u> : A Ph.D. thesis.	thesis √ A thesis written to satisfy requirements for a degree; Use genre to specify the type of thesis	"Thesis" √ (Thing > CreativeWork > Thesis)	Dissertation . A written essay, treatise, or thesis, especially one written by a candidate for the degree of Doctor of Philosophy
fabio:Book : A non-serial document that is complete in one volume or a designated finite number of volumes. A book published by a publisher is usually identified by an International Standard Book Number (ISBN), and may be manifested as a physical printed publication on paper bound in a hard or soft cover, or in electronic format as an 'e-book'.	Edited book : A non-serial document that is complete in one volume or a designated finite number of volumes. A book published by a publisher is usually identified by an International Standard Book Number (ISBN), and may be manifested as a physical printed publication on paper bound in a hard or soft cover, or in electronic format as an 'e-book'.					

Fabio	META	Ris	Bibtex	citeproc	schemaOrg	resourceTypeGeneral
Journal article : An article, typically the realization of a research paper reporting original research findings, published in a journal issue.	Journal article : An article, typically the realization of a research paper reporting original research findings, published in a journal issue.	JOUR √ (journal/periodical reference) MGZN (magazine article)	article √ : An article from a journal or magazine.	article-journal √ : An article published in an academic journal	"ScholarlyArticle" √ (Thing > CreativeWork > Article > ScholarlyArticle) "Article" √ (Thing > CreativeWork > Article) — An article, such as a news article or piece of investigative report. Newspapers and magazines have articles of many different types and this is intended to cover them all.	Text / JournalArticle (introdotta in versione 4.4 marzo 2021). A written composition on a topic of interest, which forms a separate part of a journal.
fabio:Book : A non-serial document that is complete in one volume or a designated finite number of volumes. A book published by a publisher is usually identified by an International Standard Book Number (ISBN), and may be manifested as a physical printed publication on paper bound in a hard or soft cover, or in electronic format as an 'e-book'.	Monograph : Books can be registered as a monograph, series, or set. a <i>book</i> is single book (monograph) that is not part of a series or a set.					

Fabio	META	Ris	Bibtex	citeproc	schemaOrg	resourceTypeGeneral
	Other	GEN ✓ (generic) ADVS (audiovisual material) // VIDEO (video recording) UNPB (unpublished work reference) CTLG (catalog) ART (art work) CASE (case) ICOMM (internet communication) INPR (in press reference) MAP (map) MPCT ✓ (motion picture) MUSIC (music score) PAMP (pamphlet) PAT (patent) PCOMM (personal communication) CATALOG ELEC (electronic citation) HEAR (hearing) STAT (statute BILL (bill/ resolution) UNBILL (unenacted bill/ resolution)	Misc: Use this type when nothing else fits. A warning will be issued if all optional fields are empty (i.e., the entire entry is empty or has only ignored fields). Unpublished: A document having an author and title, but not formally published.	article ✓ A self-contained work made widely available but not published in a journal or other publication; Use for preprints, working papers, and similar works posted on a platform where some level of persistence or stewardship is expected (e.g. arXiv or other preprint repositories, working paper series); For unpublished works not made widely available or only hosted on personal websites, use manuscript	"CreativeWork" ✓ (Thing > CreativeWork) "Event" ✓ (Thing > Event) Service ✓: <u>Thing</u> > <u>Intangible</u> > <u>Service</u> A service provided by an organization, e.g. delivery service, print services, etc. Thing > CreativeWork > MediaObject ✓	Other. If selected, supply a value for Resource Type. DataPaper : A factual and objective publication with a focused intent to identify and describe specific data, sets of data, or data collections to facilitate discoverability. A data paper describes data provenance and methodologies used in the gathering, processing, organizing, and representing the data (work). Audiovisual: A series of visual representations imparting an impression of motion when shown in succession. May or may not include sound. (Movie in fabio) InteractiveResource. A resource requiring interaction from the user to be understood, executed, or experienced. Training modules, files that require use of a viewer (e.g., Flash), or query/ response portals. PhysicalObject. An inanimate, three-dimensional object or substance Artifacts, specimens Event. A non-persistent, time-based occurrence. Descriptive information and/or content that is the basis for discovery of the purpose, location, duration, and responsible agents associated with an event such as a webcast or convention Service. An organized system of apparatus, appliances, staff, etc., for supplying some function(s) required by end users Data management service, or long-term preservation service Text. A resource consisting primarily of words for reading that is not covered by any other textual resource type in this list

Fabio	META	Ris	Bibtex	citeproc	schemaOrg	resourceTypeGeneral
fr:ReviewVersion: A version of a given review, defining its content and rating, which may vary over the time.	Peer review: any number of reviews, reports, or comments attached to any other work that has been registered with Crossref.				"Review" (Thing > CreativeWork > Review) - A review of an item - for example, of a restaurant, movie, or store.	PeerReview. Evaluation of scientific, academic, or professional work by others working in the same field

Fabio	META	Ris	Bibtex	citeproc	schemaOrg	resourceTypeGeneral
fabio:WebContent : Information prepared specifically and primarily for manifestation in a web page, comprising text, images, datasets and/or other works.	Posted content(or web content) : Posted content includes preprints, eprints, working papers, reports, dissertations, and many other types of content that has been posted but not formally published. Note that <i>accepted manuscripts</i> are not considered posted content. To qualify as posted content, an item must be posted to a host platform where it will receive some level of stewardship. We're all about persistence, so it's vital that everything registered with us be maintained. A preprint should remain online once it has been posted, including once it has appeared in a journal or if an updated version becomes available. If different versions become available, the preprint owner should update the preprint metadata using relations tags . In exceptional cases where a preprint is removed, such as in the case of plagiarism or other misconduct, we recommend that the DOI resolves to a page containing at least the title, authors, and a short explanation of the removal. Preprint owners should refer to good practice for journal article retraction in this case. Note that we cannot remove preprint metadata from our records.			post-weblog √: a blog post	"BlogPosting" √ (Thing > CreativeWork > Article > SocialMediaPosting > BlogPosting)	
fabio:ProceedingsPaper : A paper, typically the realization of a research paper reporting original research findings, usually published within an academic proceedings volume.	Proceedings article		Inproceedings : An article in a conference proceedings.	Paper-conference √: A paper formally published in conference proceedings. For papers presented at a conference, but not published in a proceedings, use speech		ConferencePaper :Article that is written with the goal of being accepted to a conference

Fabio	META	Ris	Bibtex	citeproc	schemaOrg	resourceTypeGeneral
fabio:ReportDocument the realization of a report, usually in printed form, where Report : A formal factual, methodological, statistical, technical or research report issued by an individual, group, agency, government body or other institution.	Report : A formal factual, methodological, statistical, technical or research report issued by an individual, group, agency, government body or other institution.	RPRT √ (report)	Techreport : A report published by a school or other institution, usually numbered within a series.	report √ A technical report, government report, white paper, brief, or similar work distributed by an institution; Also used for manuals and similar technical documentation (e.g. a software, instrument, or test manual); If a container-title is present, the item is interpreted as a chapter contained within a larger report	"Report" √(Thing > CreativeWork > Article > Report)	Report . A document that presents information in an organized format for a specific audience and purpose

Fabio	META	Ris	Bibtex	citeproc	schemaOrg	resourceTypeGeneral
Reference book: A book containing authoritative factual information, such as a dictionary, encyclopaedia, handbook or field guide, which is a realisation of a certain reference work and may contain several reference entries.	Reference book: A book containing authoritative factual information, such as a dictionary, encyclopaedia, handbook or field guide, which is a realisation of a certain reference work and may contain several reference entries.					
Book chapter: A defined chapter of a book, usually with a separate title or number.	Book chapter: A defined chapter of a book, usually with a separate title or number.	CHAP √ (book chapter reference)	inbook: A part of a book, e.g., a chapter, section, or whatever and/or a range of pages.	chapter: √ A part of a book cited separately from the book as a whole (e.g. a chapter in an edited book); Also used for introductions, forewords, and similar supplemental components of a book	“Chapter” √ (Thing > CreativeWork > Chapter)	BookChapter: One of the main divisions of a book.
doco:Part, part of a fabio:Book : A container of a semantic subdivision of a document. For example, chapters of a novel may be grouped into distinct parts that may be named 'Part 1', 'Part 2', etc., 'Book 1', 'Book 2', etc., or 'Genesis', 'Exodus', etc.	Book part : A container of a semantic subdivision of a document. For example, chapters of a novel may be grouped into distinct parts that may be named 'Part 1', 'Part 2', etc., 'Book 1', 'Book 2', etc., or 'Genesis', 'Exodus', etc.		incollection : A part of a book having its own title.			
fabio:ExpressionCollection, part of a fabio:Book . A collection of expressions, for example a periodical or a book series.	Book section: part of a fabio:Book . A collection of expressions, for example a periodical or a book series.					
fabio:Expression: A subclass of FRBR expression, restricted to expressions of fabio:Works . For your latest research paper, the preprint submitted to the publisher, and the final published version to which the publisher assigned a unique digital object identifier, are both expressions of the same work.	Book track: A subclass of FRBR expression, restricted to expressions of fabio:Works . For your latest research paper, the preprint submitted to the publisher, and the final published version to which the publisher assigned a unique digital object identifier, are both expressions of the same work.					
fabio:Expression: A subclass of FRBR expression, restricted to expressions of fabio:Works . For your latest research paper, the preprint submitted to the publisher, and the final published version to which the publisher assigned a unique digital object identifier, are both expressions of the same work.	Component: Component records are often registered for figures, tables, and supplemental materials associated with a journal article.					
Reference entry : A particular reference entry containing authoritative factual information on a certain topic, usually contained in a larger expression.	Reference entry : A particular reference entry containing authoritative factual information on a certain topic, usually contained in a larger expression.					

Fabio	META	Ris	Bibtex	citeproc	schemaOrg	resourceTypeGeneral
Book series : A sequence of books having certain characteristics in common that are formally identified together as a group - for instance, the books in the Law, Governance and Technology Series published by Springer.	Book series : A sequence of books having certain characteristics in common that are formally identified together as a group - for instance, the books in the Law, Governance and Technology Series published by Springer.	SER (serial - book, monograph)				
Book set : A set of books having certain characteristics in common that informally allow their identification together as a group - for instance, the books of the Harry Potter saga.	Book set : A set of books having certain characteristics in common that informally allow their identification together as a group - for instance, the books of the Harry Potter saga.					
Journal : A scholarly periodical primarily devoted to the publication of original research papers. [Printed and electronic manifestations of the same journal are usually identified by separate print and electronic International Standard Serial Numbers (ISSN or eISSN, respectively), that identifies the journal as a whole, not to individual issues of it.]	Journal : A scholarly periodical primarily devoted to the publication of original research papers. [Printed and electronic manifestations of the same journal are usually identified by separate print and electronic International Standard Serial Numbers (ISSN or eISSN, respectively), that identifies the journal as a whole, not to individual issues of it.]	JFULL (journal/ periodical - full)			"Periodical" √ (Thing > CreativeWork > CreativeWorkSeries > Periodical // Thing > Intangible > Series > CreativeWorkSeries > Periodical) — A publication in any medium issued in successive parts bearing numerical or chronological designations and intended, such as a magazine, scholarly journal, or newspaper to continue indefinitely.	Journal. A scholarly publication consisting of articles that is published regularly throughout the year.

Fabio	META	Ris	Bibtex	citeproc	schemaOrg	resourceTypeGeneral
fabio:AcademicProceedings A document containing the programme and collected papers, or their abstracts, presented at an academic meeting.	Proceedings (Crossref conference proceedings?) Conference proceedings are often one of the first ways that researchers communicate new, innovative, and emergent research to their peers and the scholarly community. While this content type can be a precursor to a more formal peer-reviewed journal article, conference proceedings are critical to communicating new concepts that further enrich the research nexus .	CONF √ (conference proceeding)	proceedings √ : Conference proceedings.			ConferenceProceeding : Collection of academic papers published in the context of an academic conference (proceedings)
fabio:Series : A sequence of expressions having certain characteristics in common that are formally identified together as a group.	Proceedings series					

Fabio	META	Ris	Bibtex	citeproc	schemaOrg	resourceTypeGeneral
fabio:Series (of some fabio:ReportDocument)	Report series					
fabio:SpecificationDocument : The realization of a specification (a standard, a workflow, etc.), where a specification is : An explicit description of, or set of requirements to be satisfied by, a material, product, resource, service or standard.	Standard					Standard. Something established by authority, custom, or general consent as a model, example, or point of reference
fabio:Series (of some fabio:SpecificationDocument)	Standard series					
Journal issue : A particular published issue of a journal, one or more of which will constitute a volume of the journal.	Journal issue : A particular published issue of a journal, one or more of which will constitute a volume of the journal.				"PublicationIssue" √ (Thing > CreativeWork > PublicationIssue)	
Journal volume : A particular published volume of a journal, comprising one or more journal issues.	Journal volume : A particular published volume of a journal, comprising one or more journal issues.				PublicationVolume" √ (Thing > CreativeWork > PublicationVolume) A part of a successively published publication such as a periodical or multi-volume work, often numbered. It may represent a time span, such as a year.	
data management plan : A structured document giving information about how data arising from a research project or other endeavour is to be manages, preserved and shared.	Fabio:dataManagementPlan : A structured document giving information about how data arising from a research project or other endeavour is to be manages, preserved and shared.					OutputManagementPlan A formal document that outlines how research outputs are to be handled both during a research project and after the project is completed. Includes data, software, and materials.
Preprint: The version of an author's original scholarly work, such as a research paper or a review, first submitted to publisher for publication. [Note: For that version resubmitted after peer-review and revision, use fabio:Postprint. For the final published version use fabio:DefinitiveVersion.]	Fabio:Preprint: The version of an author's original scholarly work, such as a research paper or a review, first submitted to publisher for publication. [Note: For that version resubmitted after peer-review and revision, use fabio:Postprint. For the final published version use fabio:DefinitiveVersion.]					Preprint. A version of a scholarly or scientific paper that precedes formal peer review and publication in a peer-reviewed scholarly or scientific journal

Fabio	META	Ris	Bibtex	citeproc	schemaOrg	resourceTypeGeneral
work collection: A collection of works	fabio:work collection: A collection of works				"Collection" √ (Thing > CreativeWork > Collection)	Collection: An aggregation of resources, which may encompass collections of one resourceType as well as those of mixed types. A collection is described as a group; its parts may also be separately described.
Image: A visual representation other than text, including all types of moving image and still image.	Fabio:Image			graphic √ A still visual work; Can be used for artwork or other works (e.g. journalistic or historical photographs); Can be used for any still visual work (e.g. photographs, drawings, paintings, sculptures, clothing); The format of the item can be specified using medium	"ImageObject" √ (Thing > CreativeWork > MediaObject > ImageObject)	Image. A visual representation other than text. Digitised or born digital images, drawings or photographs
Model: A mathematical, graphical or physical representation of some physical reality, conceptual idea or theoretical construct.	fabio:Model: A mathematical, graphical or physical representation of some physical reality, conceptual idea or theoretical construct.					Model. An abstract, conceptual, graphical, mathematical or visualization model that represents empirical objects, phenomena, or physical processes. Modelled descriptions of, for example, different aspects of languages or a molecular biology reaction chain
Computer program: A unit of computer code in source or compiled form, employing one or more algorithms to be executed by a digital computer to undertake a particular task. Computer programs are collectively called 'software' to distinguish them from the equipment ('hardware') upon which they run.	Fabio:ComputerProgram A unit of computer code in source or compiled form, employing one or more algorithms to be executed by a digital computer to undertake a particular task. Computer programs are collectively called 'software' to distinguish them from the equipment ('hardware') upon which they run.	COMP √ (computer program)			"SoftwareSourceCode" √ (Thing > CreativeWork > SoftwareSourceCode)	Software. A computer program other than a computational notebook, in either source code (text) or compiled form. Use this type for general software components supporting scholarly research. Use the "ComputationalNotebook" value for virtual notebooks.
audio document: The realization of a sound recording. (Alternativa sound recording, ma non sembra avere lo stesso significato : The creative work of making an electrical or mechanical recording of sounds, such as the spoken voice, singing, instrumental music, animal vocalizations or sound effects.	Fabio:AudioDocument	SOUND √ (sound recording)		song √ An audio recording; Can be used for any audio recording (not only music); If a container-title is present, the item is interpreted as a track contained within a larger album or compilation of recordings	"AudioObject" √ (Thing > CreativeWork > MediaObject > AudioObject)	Sound. A resource primarily intended to be heard, audio recording

Fabio	META	Ris	Bibtex	citeproc	schemaOrg	resourceTypeGeneral
Workflow: A recorded sequence of connected steps, which may be automated, specifying a reliably repeatable sequence of operations to be undertaken when conducting a particular job, for example an in silico investigation that extracts and processes information from a number of bioinformatics databases.	Fabio:Workflow					Workflow. A structured series of steps which can be executed to produce a final outcome, allowing users a means to specify and enact their work in a more reproducible manner. Computational workflows involving sequential operations made on data by wrapped software and may be specified in a format belonging to a workflow management system,
InstructionManual: An instructional document typically supplied with a technologically advanced consumer product, such as a car or a computer application, or with an item of complex equipment such as a microscope.	Fabio:InstructionManual		Manual: Technical documentation.			
	Doco:Bibliography. A document section containing a list of bibliographic references.					
Fabio:Editorial: The realization of an opinion written by an editor.	Fabio:Editorial: The realization of an opinion written by an editor.					
fabio:TermDictionary: A controlled vocabulary, usually referring to terms within a particular classification system, such as the ACM Computing Classification System or MeSH, the Medical Subject Headings, or a controlled vocabulary of disciplines.	fabio:TermDictionary: A controlled vocabulary, usually referring to terms within a particular classification system, such as the ACM Computing Classification System or MeSH, the Medical Subject Headings, or a controlled vocabulary of disciplines.

fr:ReviewVersion: A version of a given review, defining its content and rating, which may vary over the time.	Peer review: any number of reviews, reports, or comments attached to any other work that has been registered with Crossref.	Text	Systematic Review: A review of primary literature in health and health policy that attempts to identify, appraise, and synthesize all the empirical evidence that meets specified eligibility criteria to answer a given research question. Its conduct uses explicit methods aimed at minimizing bias in order to produce more reliable findings regarding the effects of interventions for prevention, treatment, and rehabilitation that can be used to inform decision making. Scientific Integrity Review: Work consisting of reports by the United States Office of Research Integrity, identifying questionable research published in articles or books. Notification of the questionable data is carried in the NIH Guide for Grants and Contracts. Review: An article or book published after examination of published material on a subject. It may be comprehensive to various degrees and the time range of material scrutinized may be broad or narrow, but the reviews most often desired are reviews of the current literature. The textual material examined may be equally broad and can encompass, in medicine specifically, clinical material as well as experimental research or case reports. State-of-the-art reviews tend to address more current matters. A review of the literature must be differentiated from HISTORICAL ARTICLE on the same subject, but a review of historical literature is also within the scope of this publication type. Comment: Work consisting of a critical or explanatory note written to discuss, support, or dispute an article or other presentation previously published. It may take the form of an article, letter, editorial, etc. It appears in publications under a variety of names: comment, commentary, editorial comment, viewpoint, etc.

fabio:WebContent : Information prepared specifically and primarily for manifestation in a web page, comprising text, images, datasets and/or other works.	Posted content(or web content) : Posted content includes preprints, eprints, working papers, reports, dissertations, and many other types of content that has been posted but not formally published. Note that <i>accepted manuscripts</i> are not considered posted content. To qualify as posted content, an item must be posted to a host platform where it will receive some level of stewardship. We're all about persistence, so it's vital that everything registered with us be maintained. A preprint should remain online once it has been posted, including once it has appeared in a journal or if an updated version becomes available. If different versions become available, the preprint owner should update the preprint metadata using relations tags . In exceptional cases where a preprint is removed, such as in the case of plagiarism or other misconduct, we recommend that the DOI resolves to a page containing at least the title, authors, and a short explanation of the removal. Preprint owners should refer to good practice for journal article retraction in this case. Note that we cannot remove preprint metadata from our records.		
fabio:ProceedingsPaper : A paper, typically the realization of a research paper reporting original research findings, usually published within an academic proceedings volume.	Proceedings article		

Fabio	META	Dublin Core	PubMed
fabio:ReportDocument the realization of a report, usually in printed form, where Report: A formal factual, methodological, statistical, technical or research report issued by an individual, group, agency, government body or other institution.	Report: A formal factual, methodological, statistical, technical or research report issued by an individual, group, agency, government body or other institution.		Technical Report: Work consisting of a formal report giving details of the investigation and results of a medical or other scientific problem. When issued by a government agency or comparable official body, its contents may be classified, unclassified, or declassified with regard to security clearance. This publication type may also cover a scientific paper or article that records the current state or current position of scientific research and development. If so labeled by the editor or publisher, this publication type may be properly used for journal articles. Case Reports: Clinical presentations that may be followed by evaluative studies that eventually lead to a diagnosis. Clinical Study: A work that reports on the results of a research study to evaluate interventions or exposures on biomedical or health-related outcomes. The two main types of clinical studies are interventional studies (clinical trials) and observational studies. While most clinical studies concern humans, this publication type may be used for clinical veterinary articles meeting the requisites for humans. Clinical Trial: A work that reports on the results of a clinical study in which participants are assigned to receive one or more interventions so that researchers can evaluate the interventions on biomedical or health-related outcomes. The assignments are determined by the study protocol. Participants may receive diagnostic, therapeutic, or other types of interventions. For clinical trials on veterinary animals see CLINICAL TRIAL, VETERINARY. Clinical Trials was used for both humans and non-humans prior to 2019. Clinical Trial Protocol: The written description of a clinical study. It contains the study's objectives, design, and methods including subject target and/or enrollment criteria. It may also present relevant scientific background and statistical information. Pragmatic Clinical Trial: A clinical trial that is designed to evaluate the effectiveness of an intervention in a real-world setting. It is typically conducted in a multi-center, randomized, controlled manner. The primary goal is to assess the impact of the intervention on a specific outcome, such as mortality, morbidity, or quality of life. The study is designed to be pragmatic, meaning it is focused on practical issues and aims to provide answers to real-world questions. It is typically conducted in a multi-center, randomized, controlled manner. fabio:AcademicProceedings A document containing the programme and collected papers, or their abstracts, presented at an academic meeting.	Proceedings (Crossref conference proceedings?) Conference proceedings are often one of the first ways that researchers communicate new, innovative, and emergent research to their peers and the scholarly community. While this content type can be a precursor to a more formal peer-reviewed journal article, conference proceedings are critical to communicating new concepts that further enrich the research nexus .		Clinical Conference: Work that consists of a conference of physicians on their observations of a patient at the bedside, regarding the physical state, laboratory and other diagnostic findings, clinical manifestations, results of current therapy, etc. A clinical conference usually ends with a confirmation or correction of clinical findings by a pathological diagnosis performed by a pathologist. "Clinical conference" is often referred to as a "clinico-pathological conference." Congress: Published record of the papers delivered at or issued on the occasion of individual congresses, symposia, and meetings; abstracts of papers delivered at such congresses; reports of the officers and delegates of such congresses; combinations of the foregoing; or proceedings of the conference of a society if they are not limited to matters of internal organization. Overall: A single citation covering papers or abstracts presented at a meeting. The publication type may be used for a single citation with or without the additional indexing or cataloging of individual papers. The individual papers, however, are not labeled OVERALL. Consensus Development Conference: Official statements of the findings or recommendations expressing the outcome of a meeting convened to evaluate current thought and research on a subject of interest. Consensus Development Conference, NIH: Official statements of the finding or recommendations expressing the outcome from a conference sponsored by NIH.
fabio:Series : A sequence of expressions having certain characteristics in common that are formally identified together as a group.	Proceedings series
